

# Analysis on Emerging Technology Skills and Trends

A Presentation by Shreevaishnavi V V

6<sup>th</sup> June 2024

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- Collecting Technology trends in various location
- Analyzing the data and identify insights and trends
  - The top programming languages
  - Top Database
  - Popular Platform
  - Popular Web Frame
- Presenting the analyses with dashboard showing current skills, future trend skills.
- Demographics

# INTRODUCTION

---

- This report uses data analytics to highlight current and projected trends in the need for skills related to programming languages, databases, platform and web frames.
- The following inquiries were investigated using the data:
  1. Which programming languages are most in demand today?
  2. What are the most in-demand database skills?
  3. What popular IDEs or Web frames are there?

# METHODOLOGY

---

- Data Collection
- Data Wrangling
- Data Exploration
- Data Visualization
- Dashboard Creation
- Presentation

# RESULTS

---

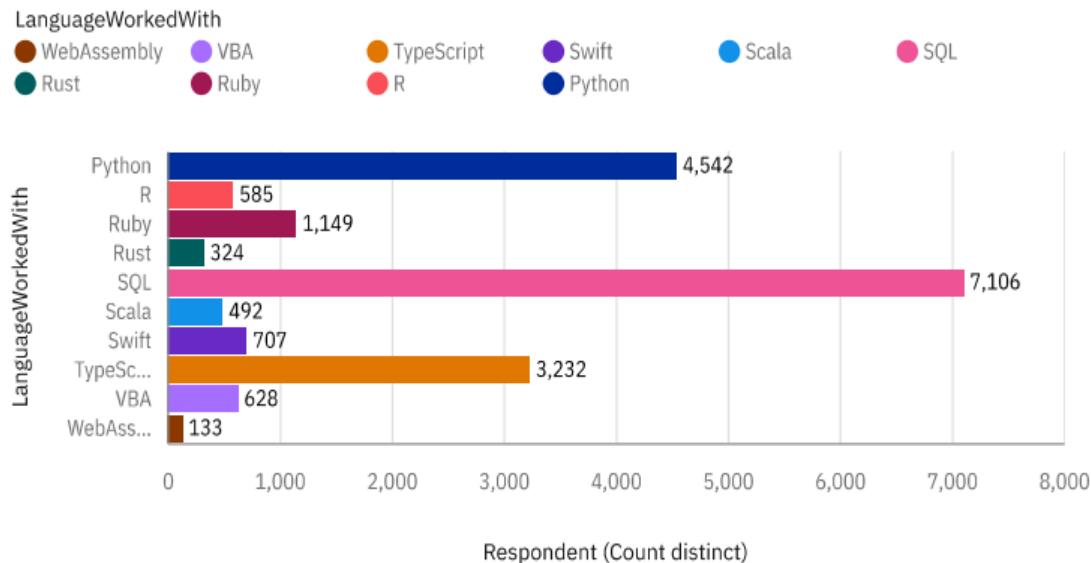

The collected data is cleaned and then analyzed by applying statistical techniques and finally the information is presented by make dashboards showing current and future trends.

# PROGRAMMING LANGUAGE TRENDS

## Current Year

## Next Year

Top 10 Language Worked With

Top 10 Language Desire Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- Javascript,HTML/CSS and SQL are top 3 in the current year.
- Python gained popularity in desired language next year.
- PowerShell popularity fall down in coming years.

## Implications

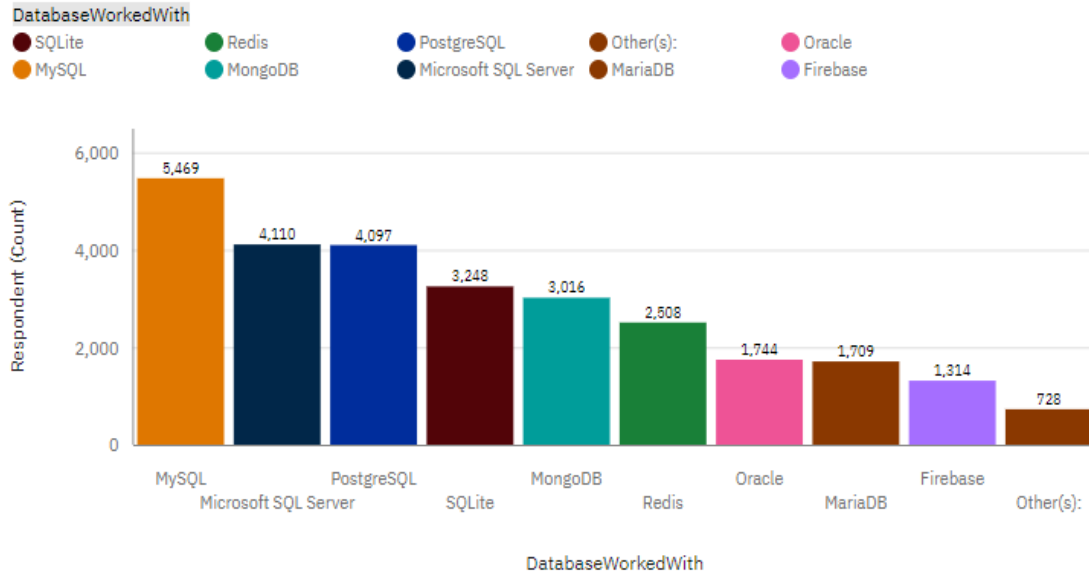

- Web Development is still in high demand.
- Python is the best choice of programming language in future.
- SQL still in high demand due to its vast application and usage.

# DATABASE TRENDS

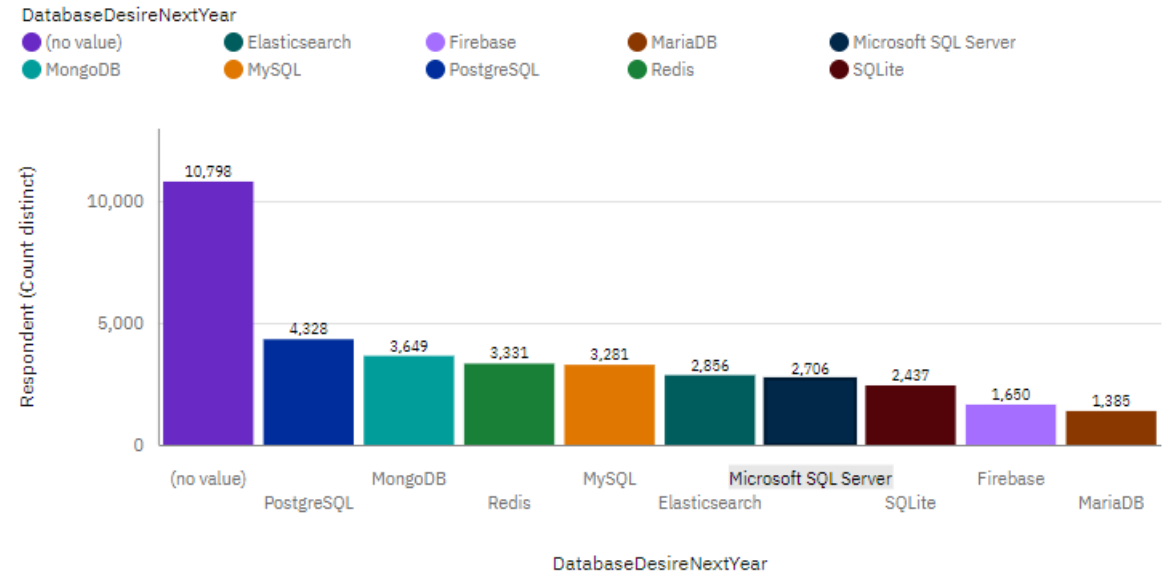

## Current Year

Top 10 Database Worked With

## Next Year

Top 10 Database Desire Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MySQL, Microsoft SQL server, PostgreSQL, SQLite and MongoDB are the top 5 most used databases at the moment.
- However, PostgreSQL, MongoDB, Redis, MySQL and Elasticsearch are projected to become more popular in the future.
- Redis and Elasticsearch are relatively new tools and are set to gain more traction in the IT space.

## Implications

- SQL is still a top tool to watch out for in data specialists.
- Companies still prefer Open source databases.
- Oracle SQL was not among the top 5. It is losing relevance as time passes.

# DASHBOARD

9

Respondent Count by Gender, Classified by Formal Education Level

10

# DISCUSSION

---

- Women places in global IT areas
- Why the SQL servers are remained the most interest in the future?
- What is the key value of HTML/CSS to be still required?
- Upskilling in the technology sector.
- How do we close the wide gender gap in the technology sector?

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- By next year Javascript and HTML/CSS will be in top positions.
- Python is most used programming language.
- PostgreSQL is presented to be the top .
- Platform Linux is the largest proportion while windows will be replaced by Docker.
- React.js is predicted to be the highest preference of WebFrame .
- Most people in the IT field have a Bachelor's degree.

## Implications

- It is important for data professionals to develop proficiencies in NoSQL in addition to SQL databases.
- Web development is still a very lucrative skill.
- Less developed countries need more access to tech trainings and education.

# CONCLUSION

---

- HTML/CSS is estimated to stay popular
- PostgreSQL will be the most demand of database.
- Linux platform is predicted to stay at the top
- The most percentage of Webframe will be occupied by React.js
- Men are interested in IT skills more than women
